## Software Engineer

mshoaban09@gmail.com | <https://www.linkedin.com/in/muhammad-shoaban>

Johar Town Lahore, Punjab, 34000, Pakistan | +923346731495

A results-driven Full Stack Developer with 2+ years of experience crafting modern, efficient, and scalable web applications. My expertise lies in turning complex challenges into seamless digital solutions using cutting-edge technologies like Laravel, CodeIgniter and PHP, with additional experience in modern JavaScript frameworks such as React.js and Vue.js.

## Work Experience

### Software Engineer

Apr 2024 - Present

*RatedSol Tech | Dera Ghazi Khan, Punjab, Pakistan*

Full Stack PHP/Laravel Developer leading end-to-end development of scalable web applications using Laravel, CodeIgniter, PHP, and React.js. Managed SQL databases, implemented REST APIs, optimized performance, and contributed to delivering modern user-centric solutions in an agile environment.

- Lead the development of both client-facing and backend systems, ensuring seamless user experience and performance optimization.
- Collaborate with cross-functional teams including UI/UX designers to deliver robust features and functionalities.
- Architect and manage relational (PostgreSQL, MySQL) databases for various web applications.
- Use Agile methodologies and tools (Git, CI/CD pipelines) for efficient project management and continuous delivery.
- Optimize existing systems, improve performance, and ensure security and scalability across applications.

### Web Application Developer Freelance

Jan 2024 – Apr 2024

Worked as a freelance developer on Fiverr and with direct international clients, delivering scalable web solutions across diverse industries. Notably collaborated with an Afghan client on a project for the Ministry of Higher Education, providing customized software solutions to improve digital processes.

- Developed and maintained backend services, ensuring reliability, scalability, and security.
- Worked with relational databases for data modeling, indexing, and query optimization to improve performance.
- Collaborated with frontend teams (ReactJS, VueJS) to align backend functionality with UI/UX requirements.
- Gained hands-on experience with version control (Git), API versioning and backend performance optimization.
- Demonstrated quick learning and adaptability, leading to early responsibility in client-facing projects.

## Projects

### SafeSend

A secure web application allowing users with different account types to send messages and files through password-protected links with end-to-end encryption.

Key technologies and packages: Laravel, MySQL, Spatie Roles and Permissions, Stripe cashier server side, Bootstrap

### Fenapi

A feature-rich management system with advanced modules such as a wallet system, fiscal management, digital signatures, and AI-powered verification. Developed a complete API ecosystem for both the internal web platform and external integrations, including the official mobile app used by end-users.

Key technologies and packages: Codeigniter, MySQL, PayPal, ID sign digital signatures, AI verification, REST API's, Bootstrap

### MedicsExams

A mobile blood screening platform supporting different programs across multiple counties within country, with role-based access for examiners, agencies, and other users, and an internal API for mobile application management.

Key technologies and packages: Laravel, MySQL, Spatie Roles and Permissions, Square payment, Bootstrap

### Jamia Raza UI Uloom

A madrassa management system built with Laravel to digitalize the operations of a local Islamic institution.

Key technologies and packages: Laravel, MySQL, Spatie Roles and permissions, Stripe for donations, Bootstrap

## LiveWaves

A feature-rich social media platform with live streaming, event discovery, music sharing, and real-time user interaction.

Key technologies: Laravel, Sanctum package for secure API

## Almas Trading Centre

An e-commerce platform for clothes and groceries, featuring a full-featured admin panel for management and an attractive user interface for shoppers.

Key technologies: Laravel, MySQL , Spatie roles and permissions , Laravel File management

## Ministry of Higher Education of Afghanistan

A smart school management system, providing an all-in-one digital solution for schools under the ministry.

Key technologies: Codeigniter , JQuery , Bootstrap.

## Freelance Work

Worked on diverse client projects worldwide, solving different technical challenges and delivering tailored web solutions.

Key technologies: Laravel, CodeIgniter, PHP, MySQL, jQuery, Bootstrap, React.js, Vue.js.

## Core Skills

Laravel, CodeIgniter, PHP, MySQL, PostgreSQL, React.js, Vue.js, REST APIs, Backend Development,

Frontend Development, Full Stack Development, Product Development, Database Administration,

Testing, Agile Development, Team Collaboration, Git.

## Education

### Ghazi University

Sep 2021 - Apr 2025

**Bachelor of Science - BS** Information Technology

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming,

Database Management Systems, Software Engineering, Information Security, Cloud Computing

## Languages

**English** (*PROFESSIONAL\_WORKING*), **Urdu** (*NATIVE\_OR\_BILINGUAL*)

## Certificates

**Web Development with HTML , CSS and JAVASCRIPT Essentials**

*Coursera*
