

MUHAMMAD SHOABAN

Software Engineer | 2+ Years of Experience

+92 334 673 1495 | mshoaban09@gmail.com | [LinkedIn](#) | [GitHub](#) | Johar Town, Lahore, Pakistan

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web applications using Laravel, PHP, React.js, and modern cloud infrastructure. Delivered production systems across healthcare, finance, and social platforms, including REST API ecosystems, real-time notification pipelines, and payment integrations.

TECHNICAL SKILLS

Languages	PHP, JavaScript
Frameworks	Laravel, CodeIgniter, Express.js, Node.js
Frontend	React.js, Vue.js, Livewire, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS
Databases	MySQL, PostgreSQL, Database Administration & Optimization
APIs	RESTful API design, third-party integrations, payment gateway integration (Stripe, PayPal)
Cloud & DevOps	AWS (EC2, S3, RDS), Azure, CI/CD pipelines, Git deployment workflows, Linux administration
Messaging	Pusher WebSockets, Twilio, queues, schedulers, event-driven background processing
Tools	Git, GitHub, Composer, NPM, Postman, Jira
Patterns	MVC, RBAC/ACL (Spatie Roles & Permissions), multi-tenant architecture
AI Tools	AI Prompt Engineering, AI-assisted development & code generation tools

PROFESSIONAL EXPERIENCE

Software Engineer Apr 2024 – Present
[RatedSol Tech](#) • Dera Ghazi Khan, Punjab, Pakistan

- Lead end-to-end development of scalable client-facing and backend web applications using Laravel (including Livewire for reactive components), CodeIgniter, PHP, and React.js.
- Designed and shipped RESTful APIs, implemented queues, schedulers, and real-time notification systems using Pusher WebSockets and Twilio.
- Architected and managed relational databases (PostgreSQL, MySQL), focusing on schema design, indexing, and query performance optimization.
- Collaborated with cross-functional teams including UI/UX designers to deliver robust, user-centric features.
- Used Git and GitHub for version control with branch-based workflows, and built CI/CD pipelines on Azure for automated, continuous delivery.
- Optimized existing systems for performance, security, and scalability across multiple production applications.
- Leveraged AI tools and prompt engineering techniques to accelerate development cycles and streamline delivery of production systems.

Web Application Developer Jan 2024 – Mar 2024
[Freelance \(Fiverr & Direct Clients\)](#) • Remote

- Developed and maintained backend services for international clients, ensuring reliability, scalability, and security.
- Worked with relational databases for data modeling, indexing, and query optimization to improve application performance.
- Collaborated with frontend teams (React.js, Vue.js) to align backend functionality with UI/UX requirements.
- Gained hands-on experience with Git version control, API versioning, and backend performance tuning.
- Demonstrated quick learning and adaptability, earning early ownership of client-facing project modules.

KEY PROJECTS

SYM Forklift

Machine management platform for forklift and equipment operations, built end-to-end using AI-assisted development tools

- Technologies: Laravel, Livewire, MySQL.

MedicsExams

Mobile blood-screening platform with role-based access for examiners and agencies

- Technologies: Laravel, MySQL, Spatie Roles and Permissions, Square Payments, Pusher WebSockets, Twilio, Smarty Streets API, AWS, Bootstrap.

Fenapi

Feature-rich management system with wallet, fiscal management, and AI-powered digital signature verification

- Technologies: CodeIgniter, MySQL, PayPal, ID Sign digital signatures, AI verification, REST APIs, Bootstrap.

SafeSend

Secure file and message sharing platform with end-to-end encryption

- Technologies: Laravel, Livewire, MySQL, Spatie Roles and Permissions.

LiveWaves

Social media platform with live streaming, event discovery, music sharing, and real-time interaction

- Technologies: Laravel, Sanctum package for secure API.

Ministry of Higher Education of Afghanistan

Smart school management system for institutions under the ministry

- Technologies: CodeIgniter, jQuery, Bootstrap.

Freelance Work

Diverse client projects worldwide, solving technical challenges and delivering tailored web solutions

- Technologies: Laravel, CodeIgniter, PHP, MySQL, jQuery, Bootstrap, React.js, React Native, Vue.js.

EDUCATION

Bachelor of Science – BS Information Technology

Sep 2021 – Apr 2025

[Ghazi University](#)

Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Software Engineering, Information Security, Cloud Computing

CERTIFICATES

- Web Development with HTML, CSS and JavaScript Essentials — Coursera ([view credential](#))
- React, NodeJS, Express & MongoDB - The MERN Fullstack Guide — Udemy ([view credential](#))

ADDITIONAL INFORMATION

Availability: Open to remote, hybrid, and on-site roles. Available for relocation. | **Work Authorization:** Pakistan National. Open to sponsored visa opportunities.
